

Hola amigos,

I hope you are keeping well and that sales are good!

I can't believe this is the last newsletter for 2018, where did the year go?

I am pleased to let you know that I now represent two Relais & Chateaux cruise companies since the MV Origin was recently welcomed into the association!

You will notice that there are a lot of important updates from my partners so please make sure you take a look and let me know if you have any questions.

Happy reading!

Saludos,

Bec

MOUNTAIN LODGES OF PERU

Changes to the Salkantay Trek program

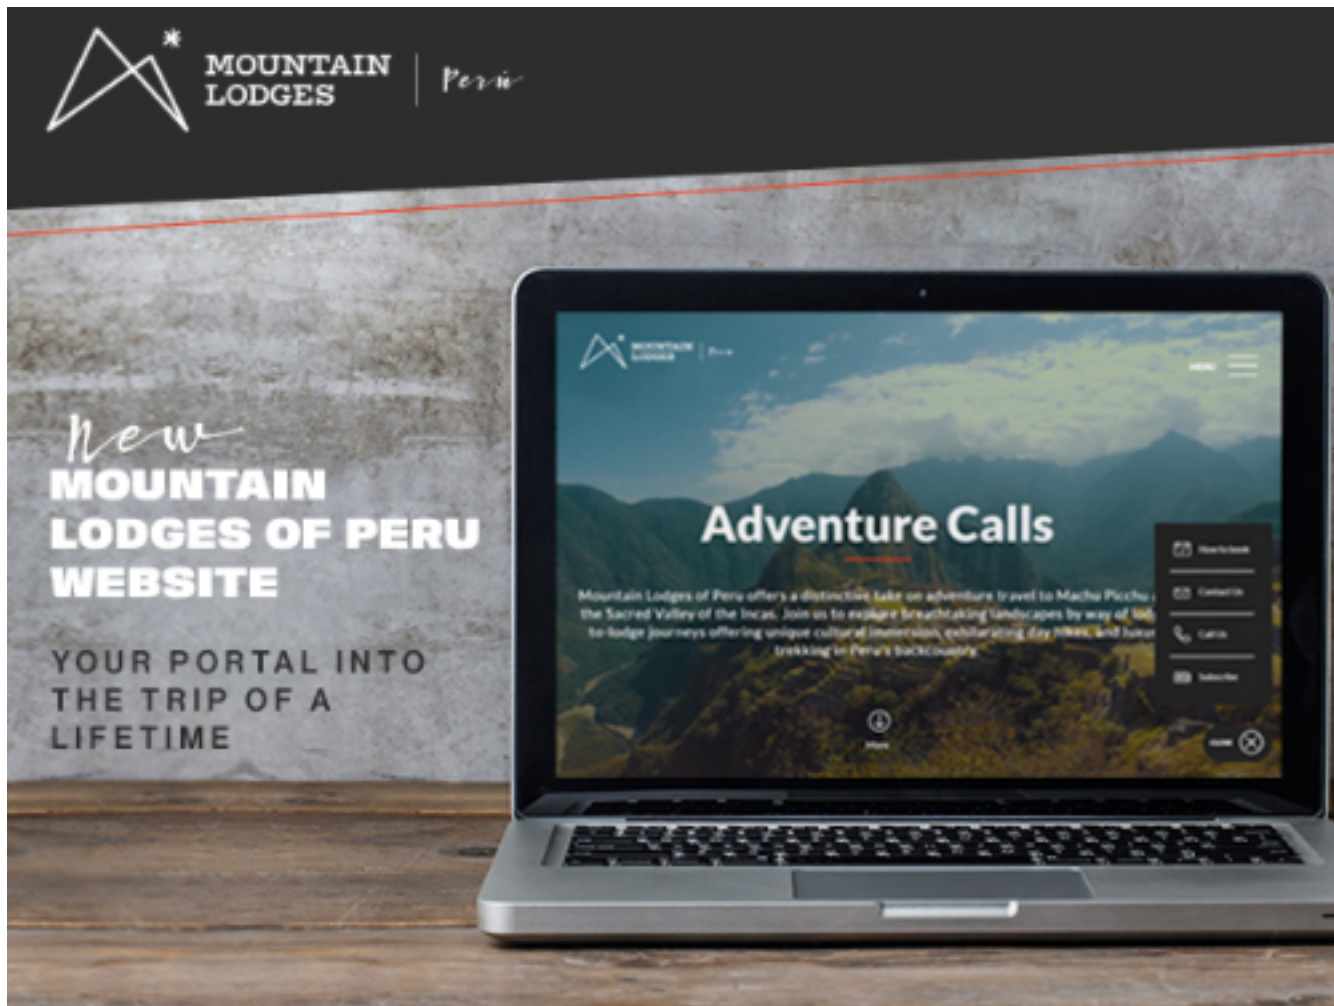

Day 1 now includes a visit to the archaeological site of Quillarumiyoc (instead of Tarawasi). Quillarumiyoc is larger, more diverse and better preserved than Tarawasi. Guests visit this site before moving on to El Pedregal to visit a typical Andean farmhouse for lunch. Everything remains the same from that point onwards. You can find the updated brochure on our website [here](#).

Changes to the Sacred Valley & Lares Adventure program

In order to continue improving the guest experience, MLP has implemented some positive changes to the Lares program. The new itinerary (only impacting **Day 3** of the 5-day program or **Day 5** of the 7-day program) results in less driving time and more activities. Guests will even have the unique opportunity to join in with a traditional Andean ceremony to honour their sheep, a very authentic experience. There are also new options for interesting hikes, archaeological sites and agricultural activities on this day. You can find the updated details in their latest brochure [here](#).

New website for MLP

[Mountain Lodges of Peru](#) launched a fantastic new website with a refined user experience. Make sure you check it out!

HOTEL LAS TORRES

New adventure activities for this 2018/19 Summer Season

[Hotel Las Torres](#) has introduced **mountain biking**, **rock climbing** and **multi-activity** excursions for the upcoming season. Reserva Cerro Paine now offers the largest variety of activities in the region! Download the detailed [activity PDF](#) or check out our [blog post](#) for more details.

Origin joins Relais & Chateaux

It's official! [Ecoventura's MV Origin](#) has become the first ship in the Galapagos to join Relais & Chateaux. Check out their listing on the Relais & Chateaux website [here](#). We are very excited to now represent two amazing Relais & Chateaux vessels!

Itinerary B changes and exclusive access to Darwin Station

Ecoventura vessels will now visit the Charles Darwin Station and Breeding Center early on Saturday mornings instead of the afternoons. **There are currently NO other Galapagos tour boats allowed at this time**, giving Ecoventura guests a more personal and exclusive experience (only on the Itinerary B - Northern and Western Route). More info [here](#).

Refurbishments for the Letty

The MY Letty has just completed dry dock during which the lounge and dining room were updated with neutral-toned interiors. You can access the latest High Res images for Letty [here](#).

DELFIN AMAZON CRUISES

Delfin awarded "Best Service" in 2019 Condé Nast Johansens Awards

Congratulations to Delfin Amazon Cruises for being awarded "Best Service" (Central & South America) in the [2019 Conde Nasté Johansens Awards!](#)

Delfin features in new Relais & Chateaux campaign

Check out the new Delicious Latin America Campaign featuring Delfin Amazon Cruises [here](#).

Celebrating 29 years of the Macaw Project

[Rainforest Expeditions](#) celebrated [29 years of their successful Macaw Project](#) in September. Since Eduardo Nycander started the Tambopata Macaw Project in 1999, scientists and volunteers have monitored over 132 wild macaws including Scarlet Macaws and their nests. Little was known about macaws prior to their research. It has been instrumental in determining their history, behaviour and the chick development process, as well as growing the population in Tambopata. Guests can learn more about this fascinating project during jungle activities and evening lectures at Tambopata Research Center (presented by resident scientists every second night).
